ABSTRACT OF THE DISCLOSURE

5 A rack-mount storage system according to one  
embodiment of the present invention may comprise an  
equipment cabinet that defines at least one device opening  
therein. A first device sized to be received by the first  
device opening defines a first mounting pathway therein.  
The first device has a chassis that is sized to receive at  
least one component of the first device and that also  
defines at least a portion of the first mounting pathway.  
10 A support spar sized to be received by the first mounting  
pathway and being sized to engage said equipment cabinet,  
engages the first mounting pathway and the equipment  
cabinet to support said first device in the equipment  
cabinet.
